(DOME HEAD STEEL RIVET - 4.8 X 18)

FITTED IMAGE

Wear the appropriate protective equipment (safety glasses & gloves) while fitting this product.

Dispose of packaging materials responsibly - Do not dispose until you have checked all parts and fixings are present.

1.1. REMOVAL OF DOOR CARD

Take off the inner door card by firstly removing the 9 plastic clips securing the card.

1.2. REMOVAL OF DOOR CARD

Carefully rotate the door card so you can pull it over the inner door handle. **Note:** The inner door handle surround does not unclip in the same way as the 2006-2017 model).

2.1. REMOVAL OF INTERNAL RELEASE HANDLE

Remove the inner door handle assembly as a complete unit. There is a hook/tab in the top of the assembly which needs to be unclipped to allow the top to slide across from right to left.

2.2. REMOVAL OF INTERNAL RELEASE HANDLE

To allow the assembly to be fully removed, press inward the tab on the underside of the assembly. This is shown in Fig. 2 outside of the door for easy identification

2.3. REMOVAL OF INTERNAL RELEASE HANDLE

Once the tab is depressed the whole assembly can slide from right to left and be removed from the door. There is no need to disconnect any cables.

3. POSITIONING THE SHIELD

Insert the shield into the door aperture behind the handle assembly. Hook the cable protection tab in first (FIG.1), then the bottom of the shield (FIG.2) and press up into position (FIG.3).

4.1. FIXING THE SHIELD

Ensuring the cables are not trapped, position the shield in the aperture and carefully drill 5mm holes through each hole (four positions in total).

4.2. FIXING THE SHIELD

Secure the shield into place using the supplied rivets.

5. REFITTING THE DOOR PANEL

With the shield fixed into position, refit the door handle assembly by positioning it back in its aperture, ensuring it is hooked over the door skin correctly, slide from left to right to locate it into place. Then refit the door card over the handle assembly and fix into place using the plastic clips.
